Brand Representation in Mexico | CNC and Metalworking

ZCC-CT (Zhuzhou Cemented Carbide Cutting Tools Co., Ltd.)

Global Manufacturer of Carbide and Indexable Cutting Tools

ZCC-CT is one of the world's leading manufacturers of cemented carbide cutting tools, backed by decades of experience in powder metallurgy, tool design, and advanced coating technologies. The company operates fully integrated production facilities that control every stage of the manufacturing process, from raw material preparation to final tool inspection.

The ZCC-CT product portfolio supports a wide range of CNC machining applications across automotive, aerospace, energy, medical, and general machining industries. Their tooling solutions are engineered to deliver consistent performance, predictable tool life, and competitive cost-per-part results.

ZCC USA serves as the North American arm of ZCC-CT, providing localized inventory, technical support, and distributor partnerships. Through Metalworking Specialists, ZCC-CT brands are positioned for strategic growth within the Mexican manufacturing market, supported by distributor development, application trials, and end-user technical support.

- Complete turning, milling, drilling, threading, grooving, PCD, and CBN tool offering
- Advanced substrate and coating technologies for steel, stainless, cast iron, and superalloys
- Strong R&D; investment and vertically integrated manufacturing model
- Ideal balance of performance, reliability, and cost efficiency
- Mexico-focused distributor development and CNC application support
